

SPARK TEL AVIV Educational Forum

Dr. Ilana Schumacher

Pharm.B., Ph.D, MHA

Regulation, Analytics and a bit more ... **Critical considerations for successful drug development**

Lecture topics

- Why there are so many various laws, rules standards, directives and guidelines?
- Do we really need all this regulation and what could really go wrong if we won't?
- During the presentation, we will walk through some acronyms, such as ICH, GMP, USP, CMC, API,QA, QC and some of the basic regulatory terms (Risk management, Analytics, Validation, Specifications, Impurities, Stability, Packaging, etc.) and, hopefully, agree that in order to succeed we should become closely acquainted with them.

Ilana Schumacher is a pharmacist, graduated from the Hebrew University's school of Pharmacy, M.Sc. and Ph.D degrees in Biochemistry and MHA.

Experienced Quality Assurance and Analytical specialist in pharmaceuticals, medical devices and combination products.

Retired from IDF after 26 years of service in the Medical forces, serving as a clinical pharmacist in Sheba Medical Center and as a head Research and Quality Control Laboratory. Ilana worked as a QA and project manager in a startup company, setting up, implementing and managing quality procedures, successfully preparing the company for regulatory audit. For the last 6 years Ilana provides consulting services, CMC, internal and external audits. She regularly contributes to community education in health care management and rational use of pharmaceuticals.
