

## Looking for a full-time Research Manager for PET/SPECT/CT

טכנאי/ת מעבדת שירות PET  
יחידת הצב"מ / הפקולטה לרפואה

### Job description: 100% position

- Responsible for management of the PET/SPECT/CT in the Sackler Cellular and Molecular Imaging Center of the Interdepartmental Core Facility of the Faculty of Medicine
- Consultant for PET/SPECT/CT projects
- Perform hands-on PET/SPECT/CT applications
- Responsible for designing experiments with PIs and trainees using radio-labeled reagents (18F-DG; 64Cu, 89Zr, etc.)
- Responsible for day-to-day operation of instruments
- Responsible for communications between instruments, and PIs and communications between instruments and companies for maintenance and repair.
- Responsible for teaching and educating trainees from designated labs how to operate and analyze data acquired on the instrument.

### Requirements

- PhD, with preference for physics-trained scientist or radio-chemist
- Expertise in designing and execution of experiments with a PET/CT or SPECT/CT or combination of PET/SPECT/CT
- Ability to be independent and take the lead in design of experiments and provide services for the scientific community
- Excellent communication skills
