

Chief Operations and Technology Translation Director

Gray School of Medical Sciences

The Gray School of Medical Sciences is looking for an enterprising and results-driven leader to guide its operational and translational research efforts. This role offers a unique opportunity to shape how cutting-edge discoveries move from the lab to real-world applications. The ideal candidate will bring a strategic mindset, deep industrial experience in BioMedTech or Pharma, and a passion for building bridges between academia, commercial and clinical impact.

Role Overview

Reporting to the School's Head, the Chief Operations and Technology Translation Director will oversee the integration of research, development, and commercialization efforts.

Key Responsibilities:

- Lead and coordinate the School's technology development and business translation efforts.
- Advance cutting-edge research projects in collaboration with researchers, clinicians, laboratories, and biotech companies.
- Build and manage strategic partnerships with external organizations, including CROs and CDMOs, biotech firms, VCs, and clinical collaborators.
- Foster entrepreneurship and a start-up-oriented approach.
- Cultivate partnerships with industry, investors, and clinical collaborators.
- Initiate and strengthen national and international collaborations with leading research centers, health institutes, and BioMedTech/pharmaceutical companies.
- Drive technology commercialization, IP development, and startup formation.

Minimum Requirements

- Applicants must hold a PhD, MD, MD/PhD, PhD/MBA or MD/MBA in life sciences, medicine, chemistry, or a related discipline, with a minimum of 10 years of post-graduate experience.
- Proven scientific leadership and management experience in Pharma or BioMedTech industry.
- Strong communication and mentoring skills, with the ability to inspire others towards the achievement of goals.

This is a rare opportunity to lead a world-class institution at the forefront of biomedical innovation. If you're driven by impact, collaboration, and the challenge of translating science into solutions, we invite you to apply.
